Books by D. Bruce Means

Whitney, Ellie, D. Bruce Means, and Anne R. Rudloe. 2004. PRICELESS FLORIDA: Natural Ecosystems and Native Species. The natural ecosystems of Florida from the abyssal plain of the Gulf of Mexico to longleaf pine turkey oak sandhills. More than 18 years in the writing, this is the only book that treats all of Florida's magnificent ecosystems and is written for the lay person and teachers, as well as the professional biologist. Illustrated with more than 800 color photographs, many by D. B. Means. Pineapple Press, Melbourne, FL.

Valentine, James and D. Bruce Means. 2006. FLORIDA MAGNIFICENT WILDERNESS, State Lands, Parks, and Natural Areas. A table-top photography book about the publicly owned lands in Florida and the ecological and species diversity they harbor. Illustrated with 120 full- and double-page color photographs. Pineapple Press, Melbourne, FL. 144 pages.

Means, D. Bruce. 2006. HERPETOPHILIA, Love of Creeping, Crawling Things. A book about the author's work with creeping, crawling things such as snakes, frogs, salamanders, and earthworms. Means believes that, if people had the experiences with, and insights about, these wonderful animals as much as he does, then mankind would come to value such creatures instead of loathe them. A powerful case is made that all creatures on the planet are our "cousins" and should be respected as such and better efforts made for their conservation. (Cornell University Press, in review.)

Means, D. Bruce. 2007. DIAMONDS IN THE ROUGH, Natural history of the Eastern Diamondback Rattlesnake. A book about the natural history of the eastern diamondback rattlesnake based on the author's eight-year radiotelemetry study of a free-ranging population and 25 years of subsequent follow-up research. (In preparation.)

Means, D. Bruce and James Valentine. 2007. ISLANDS IN THE SKY, Lost Worlds of El Dorado. A large-format, table-top book about one of the world's premier biodiversity hotspots, the tepui region of southeastern Venezuela and adjacent Guyana and Brazil. The book showcases the spectacular physical beauty of tepuis, ancient mesas that rise to 10,000 feet out of virgin rainforests of the upper Orinoco and Amazon river drainage basins, and it draws attention to the unique biodiversity and endemism of this ancient shield region of South America. (In preparation.)

Means, D. Bruce. 2007. MEMORIES OF A NATURALIST. An autobiography, tracing his life-long interests in natural history from his childhood in California and Alaska to his mid-adult years based out of Tallahassee, Florida. (Partially written.)

Means, D. Bruce. 2007. A NATURALIST IN THE GARDEN OF EDEN. A book about the author's 40+ years of research and natural history observations in the Florida Panhandle and Coastal Plain of the southeastern United States, a large natural region – largely overlooked and underappreciated – with some of the country's highest biodiversity and endemism. (In preparation.)

Means, D. Bruce. 2007. TREASURES OF EL DORADO. A book about the author's search for natural history treasures of the remote interior of one of the world's last remaining virgin rainforests and unexplored mountains. A narrative of his travels on foot in search of frogs and reptiles, and an account of the impact on nature of the back-country, freelance, diamond-mining industry. (In preparation.)
